

# Colour Wheel

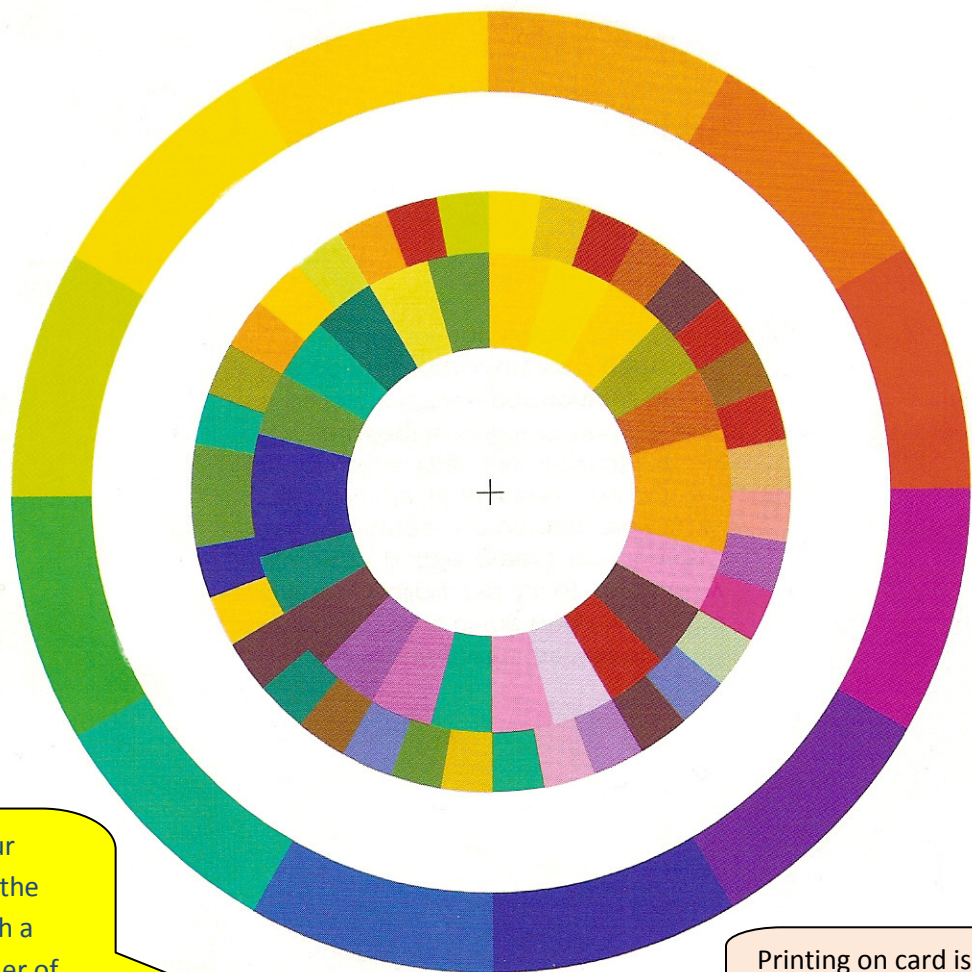

Mixing and matching colours is sometimes really difficult so why not try our **Colour Wheel** to find the colours that harmonise and colours that contrast.

1: Simply cut out both circles carefully.

2: With a sharp knife, cut out the two 'windows' in the top wheel so that the colours will show through

3: Match the circles (centre crosses) so that the colours align (smaller circle on top)

4: Insert a paperclip in the centre so that the circles will revolve.

For a longer lasting colour wheel why not laminate the pieces before joining with a paperclip? Leave a border of 1cm if you do. ☺

Printing on card is also a good idea.
